CRAFTSMAN STYLE COTTAGE

With all the tantalizing elements of a cottage and the comfortable space of a family-sized home, this Arts and Crafts one-story is the best of both worlds. Exterior accents such as stone wainscot, cedar shingles under the gable ends, and mission-style windows just add to the effect.

Two bedrooms with a kids hide out along the right side of the interior plan. Bedroom 3 and the master bedroom have walk-in closets. Living and dining areas include a large great room and a dining room with sliding glass doors to a rear patio. A warmth hearth lights the great room. The open corner kitchen features a large island counter and a giant walk-in pantry. A laundry alcove connects interior spaces to the three-car garage.
